

Make Ready Application Checklist

Use this checklist to assist in completing the application.

Business Site Information

- Alabama Power account number (if already established)
- Business name and address
- Contact Information
- Federal tax ID number

Site Specification

- Is the site an existing facility or new construction?
 - If new, what is the current stage of construction?
- What type of property/facility is the site? (i.e., commercial, mass transit, industrial, etc.)
- How many electric vehicle charging ports are currently installed at the site?
- Where do you plan to install the chargers?

Type of Charger

- What is the quantity, power output, manufacturer and model of the Level 2 (AC) chargers that will be installed (if applicable)?
- What is the quantity, power output, manufacturer and model of the DC fast chargers that will be installed (if applicable)?
- How will the chargers be used (public, employee, customers, fleet, off-road, etc.)?

Project Assessment

- When do you plan on having the chargers installed?
- Has an installer been identified?
- Does the site have adequate panel and transformer capacity to support the installation?
- Has a certified electrician performed a site assessment?
- Do you plan to separately meter the charging station loads?
